

Hong Kong Radiographers' Association
Annual Scientific Meeting
2004

Date: 28TH Feb., 2004

Time: 2:45p.m. - 5:00p.m.

Venue: Room HJ302

Hong Kong Polytechnic University

ASM 2004

Schedule

Program Rundown:

2:15p.m. Reception

2:45p.m. Topic: The Digital Cycle

Mr. Wong Ting Hei, Edward, Tuen Mun Hospital

3:15p.m. Topic: Clinical Audit - waiting time for radiotherapy

Mr. Philip Ho, Tuen Mun Hospital

3:45p.m. RECESS

4:00p.m. Topic: The latest Technology and Application in

MDCT and CTA

Medical Solution, Siemens Ltd.

Speaker: Mr. Wong Ting Hei, Edward

Institute: Tuen Mun Hospital

Topic: The Digital Cycle

Abstract:

The importance and impact of information technology on our economy and our way of life is taken as axiomatic nowadays. Think about how many of your neighborhood bought their new DC and dump the conventional cameras. Huge change also takes places in the Radiology Departments in Hong Kong. The installation of CR and DR substitutes conventional cassettes during each replacement. Viewing Boxes are silently replaced by PACS workstations. The speed of the computers is faster but less expensive. Everyone seek automation. Management of data becomes an important issue.....

In my presentation, I would like to discuss with you the digital cycle from its production, verification, distribution and storage. Lastly I would demo some bonus which is exacted from the digital images.

Speaker: Mr. Philip Ho

Institute: Tuen Mun Hospital

Topic: Clinical Audit - waiting time for radiotherapy

Abstract:

A clinically led initiative which seeks to improve the *quality* and *outcome* of patient care through structured *peer review* whereby clinicians examine their practices and results *against agreed explicit standards* and *modify their practice* where indicated. The Objective of this project was going to investigate causes of failures and make remedies accordingly.

Speaker: Representative of Siemens Ltd.

Institute: Medical Solution, Siemens Ltd.

Topic: The latest Technology and Application in MDCT and CTA

Abstract:

MDCT Sensation 16 with its isotropic resolution and fast scan time make our dream come true. It can scan any part of the body within single breath hold with high quality 3D images. With S16 the CTA become routine practice.

It pushes CT imaging towards preventive care: Lung CARE - the first compute aided diagnostic SW, CT colon and Cardiac CT.

With leading technology - Siemens Syngo Speed 4D, the Sensation 16 provides magnificent 4D images in much less radiation dose.

Membership reminder:

1. The Annual Fee for membership is HK\$150.00 while the application fee is HK\$100.00. (If applicants send application form together with auto-pay authorization form, \$100 entrance fee will be waived)
2. Application approved 1st December through 31st December are effective the next calendar year.
3. Please send your application / renewal / update form and cheque (if applicable) to Hong Kong Radiographers' Association c/o Department of Radiology, Tuen Mun Hospital, Tuen Mun, N.T. Hong Kong.
4. For any enquiry, please contact Mr. Edward Chan at Tel No. 92026504 or address it through email (info@hkra.org.hk).
