## Chairman's Message

Times flies and it was already Q4 of 2015. After HKRRTC, which is the major event of Radiography in Hong Kong, we deserve some rest. HKRA, during this period continues to seek and prepare for education programs. Shortly this month (28-Oct) and next month (8-Nov), we will have two RCEPs for our members to enrich professional knowledge and gain CPD. Please take these opportunities to add your annual CPDs. After participating the RCEP, it is time to print the CPD record via our website. This printout was already approved by the Hong Kong Radiographer Board. 2015 is the 120th anniversary of X-ray Discovery; we will celebrate the World Radiography Day by hosting the 1st Hong Kong World Radiography Day Carnivals in Polytechnic University. I wish both our Profession and the Public can join this Open Day and it is a good chance to introduce our role as Radiographers and how we care the patients. More to come...

Edward Wong

## Radiation Dose Optimization Ambassador

Radiological Examination accounts for more than 50% of human received ionizing radiation. Western Countries show much concerns and try to regulate by setting up dose monitoring and quality assurance standards. Hong Kong as the hub of APAC is a good starting point to comply with the international requirement. In this sense, HKRA in liaison with HKCRRT will organize a course to train up Radiographers who will get the basic knowledge of dose calculation, monitoring & optimization. Our speaker will be experts in the field and please visit our website or facebook for more information.

Cost: HK\$1500 / person  
Venue: Polytechnic University Lecture Room & Computer Laboratory  
Dose Monitoring Program used: Radimetrics Enterprise Platform from Bayer Healthcare  
Examination: ½ Hour, 30 MCQs  
Certificate will be given for at least 80% Attendance & 50 Marks in Examination

Quota is limited, and applications are first come first served!!

Preliminary Timetable:		
Session	Date & Time	Syllabus
ONE	3-Oct 2015 14:30-17:30	Introduction Radioactivity & Effects International Standards
TWO	7-Nov 2015 14:30-17:30	Data Mining Legislation Organization Optimization
THREE	12-Dec 2015 14:30-17:30	Dose Measurement & Calculation in Different Modalities
