Chairman's Message

Another half year passed and the demand for Radio-graphers both diagnostic & therapeutic continuous to stand. Our latest news is those graduated from Tung Wah College can register as Radiotherapist and therefore can help to alleviate the Manpower Shortage.

Although there is Labor Law in Hong Kong that protect us after injury on duty, there is much controversy and grey area where compensation should applied or not. HKRA would start to look into this subject and try to draft some guidelines for the Profession.

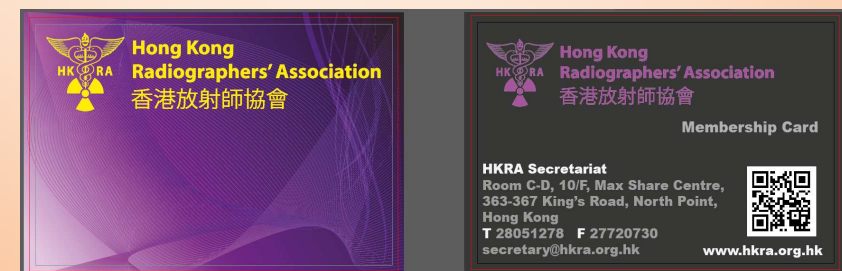

We have two new plans to help Radiographers in their careers; they are Research Fund and Apps Development. You can found more information from other columns in this newsletter.

HKRA just join the Organ Donation Champion and will promote organ donation in Hong Kong. Please consider organ donation and take actions to register.

Edward Wong

New Face of Membership Card

Members will receive the new Membership card soon and enjoy the benefit with this new card!

Upcoming Activities

Farm Visit

We are glad to organize a visit to a farm managed by Mr. Mole Yeung - a radiographer working in NTWC (named as 放射農夫 in a magazine). The farm is near to Fairview Park 錦綉花園 and able to accommodate around 30 visitors. Details will be released soon...

Soccer Champion

After playing nearly for one year, we had finished 90% of our games and we will have our final games in October.

HKRA Coordinators are our communication channels. Please spot the coordinators in your hospital region and ask for assistance for HKRA issues!

HKRA APPS Development

As you know, we are developing a HKRA Apps that is going to house numerous useful tools. We can't be success without your participation. If you are interested, please contact us for details. HK\$3000 honorarium will be given for each tool. Take a look to the attached document and start to apply if you are interested.

<http://hkra.org.hk/news/Apps...>

HKRA Research Fund

Call for Grant Application 2016

We are starting a new Exercise to promote Research among Radiographers and Radiation Therapists. To summarize, you can apply for a Research Fund HK\$5,000, if your research proposal is accepted by us. The date of presentation will be best in the AACRT/HKRRTC 2017, which is a Mega event coming next year in

<http://hkra.org.hk/news/Research...>

1 June 2016

HKRA Research Fund

Call for Grant Application 2016

Theme: Meeting Challenges in an Evolving Profession

The aim of the HKRA Research Fund is to promote research that helps improve the standards of delivery and practice of medical imaging and radiotherapy as well as to encourage evidence-based practice. The new HKRA Research Fund was set up to support the 21st Asia Australasia Conference of Radiological Technologists (AACRT), which is held in conjunction with 5th Asia Radiotherapy Symposium, and 3rd Hong Kong Radiographers & Radiation Therapists' Conference.

The Conference will be held on 23-25 June 2017 in Hong Kong Science Park. The theme of the Conference is the "Meeting Challenges in an Evolving Profession". This is a general theme that does not confine any specialties in our Profession. Therefore Radiographers in all streams are able to participate in their specialty research and apply for the Research Fund.

Around this theme, you and your colleagues are invited to submit a research proposal. Bids may include new methodology and modification to standard protocols and procedures, which may result in enhancement in workflow, patient care or others. Applications with other themes are also welcome but priority will be given to applications following the proposed theme.

The grant is HK\$5000 if you are succeeded. And you must participate and present your work during the Conference. Full details of the Research Fund Guidelines and application form can be downloaded from the HKRA website: www.hkra.org.hk. The closing date for submission of grant application is 30 June 2016. Funding decision will be announced before August 2016.

Injury at work

The Hong Kong Radiographers' Association will support members and offer appropriate advice and support to members who do raise concerns about Injury at work (on duty). It is important to stress that the Association cannot raise concerns on behalf of members. However we are going to draft a document to provide guidance for members.

Hong Kong Radiographers' Association had joined the Organ Donation Promotion Charter

We understand and agree -

- To assist in public education to facilitate the public understanding of the significance and importance of organ donation.
- Organ donation must be voluntary and altruistic.
- To encourage the public to register their wish at the Centralized Organ Donation Register (CODR) of the Department of Health (www.codr.gov.hk) and share their wish with their family.
- To assist in continuous promotional work to inculcate a culture that honors organ donation.

To inculcate a culture that honors organ donation, we are committed to -

- Promoting organ donation to allow members/staff to understand and be receptive of the idea of organ donation;
- Encouraging members / staff to register at the CODR (www.codr.gov.hk) of the Department of Health;
- Encouraging members / staff to share their wish of donating organs as well as inviting their family members to support organ donation;
- Encouraging the public to express their wish for organ donation through different channels; and
- Participating in promotional activities or arrange programmes to promote organ donation.
