Infection Control,
Cho Ray Hospital

High Impact Roles & Safety of Radiology Technologists during COVID-19 Pandemic in Asia

Amid the novel coronavirus pandemic, radiologic technologists have a key role to play in helping their hospitals respond to the crisis - from infection control to offering patient support and best practices for coping with COVID-19. In line with this, we would like to invite you to the live webinar discussing how radiology is stepping up to cope with the crisis and how radiology technologists can best protect themselves, their departments, and their patients.

LIVE WEBINAR

09:00 - 12:40
May 16th, 2020
(GMT +7)

High Impact Roles & Safety of Radiology Technologists during COVID-19 Pandemic in Asia

REGISTER NOW

Click Register Now for more info of the agenda and our panelists!

ISRRT together with Associations from Philippines, Myanmar & Vietnam will issue CME certificate for attendees who has answered correctly 2 out of 3 questions on our test (test link will be sent to registrants' emails after the webinar and will be closed within 24 hours).

After registering, you will receive confirmation email and reminder emails containing link to the webinar. You can also join with our [YouTube link here.](#)
