

Dear fellow radiographers,

**Merry Christmas & Happy New Year 2012**

Isn't it wonderful to conclude a year with a joyous holiday season? I would like to greet you all Merry Christmas and Happy New Year 2012. To Hong Kong Radiographers' Association, this year was fruitful, as our member size grew considerably larger. Many more friends joined the family as coordinators in their centres of practice to keep us closer together.

We do value a stronger profession with a reputable image through unity as radiographers, diagnostic or therapeutic, GS or HA, public or private. We do hope to be better represented, protected and supported when in need. We do like to have more educational opportunities, meeting grounds and memorable gatherings for old times' sake. These are the expectations and goals our association striving to head towards and meet. Your participation and continued rapport is certainly an invaluable driving force.

You are cordially invited to be, or continue to be one of our members by completing the enclosed subscription form and hand it to your hospital coordinator. Yet you could join us at the upcoming website membership subscription with electronic payment due to augment in March 2012.

Yours Sincerely,

Derek W.H. KWAN  
Chairman  
Hong Kong Radiographers' Association
